

Organic Silicone Defoamer

AFW-10Z

Introduce

This product is made of modified polysiloxane as the main component, with emulsifier, dispersant and stabilizer, and refined by special process. It is a high-efficiency defoamer developed specifically for various water treatment systems, with the following characteristics: fast defoaming speed, long anti-foaming time, good temperature resistance and stability, non-toxic, non-corrosive, no adverse side effects, especially no destructive effect on various bacteria, and no damage to the environment.

Features

- Excellent anti-foaming performance
- Will not pollute water bodies or damage bacterial strains
- Good stability in high-salt environments
- **Application**
- Evaporative water treatment

Item	Index
Appearance	Transparent liquid
Viscosity(25°C)	1500-5000Pa.s
Density	0.9~1.1g/ml
Solid content	38+1%
PH	6-9

Organic Silicone Defoamer

AFW-10Z

Method of use

- Direct addition: Pour the defoamer directly into the treatment tank at a fixed time and point.
- Continuous addition: Equip a flow pump at the relevant location where the defoamer needs to be added, and continuously add the defoamer to the system at a specified flow rate.

Transportation and packaging

- Packaging: Available in 25kg, 120kg, 200kg plastic drums or ton boxes.
- Storage: Store at room temperature, away from heat and sunlight. Avoid contact with acids, alkalis, or salts. Keep sealed to prevent contamination. Shelf life: 6 months. If layered, stir well before use.
- Transportation: Keep sealed, protect from moisture, acids, alkalis, and rain.

Product safety

- According to the Globally Harmonized System of Classification and Labelling of Chemicals, this product is classified as non hazardous.
- No danger of combustion and explosives.
- Non toxic and environmentally friendly.
