

Polyether defoamer

AFN-140

Introduce

This product is a polyether emulsion defoamer, synthesized by a special process. It is superior to traditional non-silicon defoamers in defoaming, foam suppression and durability, while effectively avoiding the shortcomings of silicone defoamers such as poor affinity and easy oil floating.

Features

- Excellent dispersibility and stability
- No silicon, no silicon spots or sticky substances
- Excellent defoaming and anti-foaming properties
- **Application**
- It has excellent elimination and inhibition effects on microbial foam
- It has certain elimination and inhibition effects on surfactant foam
- Control of other aqueous phase foam

Item	Index
Appearance	Transparent liquid
Viscosity(25°C)	≤3000Pa.s
Density	0.9~1.1g/ml
Solid content	≥99%
PH	5-8

Polyether defoamer

AFN-140

Method of use

- Direct addition: Pour the defoamer directly into the treatment tank at a fixed time and point.
- Continuous addition: Equip a flow pump at the relevant location where the defoamer needs to be added, and continuously add the defoamer to the system at a specified flow rate.

Transportation and packaging

- Packaging: Available in 25kg, 120kg, 200kg plastic drums or ton boxes.
- Storage: Store at room temperature, away from heat and sunlight. Avoid contact with acids, alkalis, or salts. Keep sealed to prevent contamination. Shelf life: 6 months. If layered, stir well before use.
- Transportation: Keep sealed, protect from moisture, acids, alkalis, and rain.

Product safety

- According to the Globally Harmonized System of Classification and Labelling of Chemicals, this product is classified as non hazardous.
- No danger of combustion and explosives.
- Non toxic and environmentally friendly.
