

Mineral Oil Defoamer

AFC-8034A

Introduce

AFC-8034A is a defoamer based on mineral oil, with special additives and refined by special process. It is specially designed for synthetic resin emulsions. It has excellent defoaming and antifoaming properties and good compatibility. It can be applied to latex systems such as styrene, butadiene, acrylic acid, polyvinyl chloride and its copolymers, ethylene/vinyl acetate and water-soluble alkyd.

Features

- Outstanding defoaming and antifoaming properties for pressure-sensitive adhesives and water-based laminating adhesives
- No cross-linking residues, no impact on the system
- Good compatibility in resin synthesis process

Application

- Polymer emulsion, synthetic resin

Item	Index
Appearance	Gray or light yellow turbid liquid
PH	6-9
Viscosity (25°C)	≤ 3000Pa.s
Solid content	≥ 99%

Mineral Oil Defoamer

AFC-8034A

Method of use

- Direct addition: Pour the defoamer directly into the defoaming system at a fixed time and point.
- Recommended addition amount: about 2‰, the specific addition amount is obtained through experiments.

Transportation and packaging

- Packaging: Available in 25kg, 120kg, 200kg plastic drums or ton boxes.
- Storage: Store at room temperature, away from heat and sunlight. Avoid contact with acids, alkalis, or salts. Keep sealed to prevent contamination. Shelf life: 6 months. If layered, stir well before use.
- Transportation: Keep sealed, protect from moisture, acids, alkalis, and rain.

Product safety

- According to the Globally Harmonized System of Classification and Labelling of Chemicals, this product is classified as non hazardous.
- No danger of combustion and explosives.
- Non toxic and environmentally friendly.
