

Polyether Defoamer

AFC-8034

Introduce

This product is a defoamer with modified polyether as the main body, which is refined by a special process. This product is specially designed for synthetic resin emulsion, It has excellent antifoaming properties, anti foaming properties and compatibility. It can be applied to styrene, butadiene, acrylic acid, PVC and its copolymers, ethylene / vinyl acetate and water-soluble alkyd systems. It is especially suitable for foam removal and suppression in high viscosity systems.

Features

- Excellent defoaming and antifoaming performance
- No adverse effect on the use system
- Excellent compatibility in resin synthesis process
- **Application**
- Foam control in synthetic resin process

Item	Index
Appearance	Transparent or translucent liqui
Viscosity(25°C)	≤3000mPa·s
PH	6-9
Solid content	≥99%

Polyether Defoamer

AFC-8034

Method of use

- Direct addition: Pour the defoamer directly into the treatment tank at a fixed time and point.
- Continuous addition: Equip a flow pump at the relevant location where the defoamer needs to be added, and continuously add the defoamer to the system at a specified flow rate.

Transportation and packaging

- Packaging: Available in 25kg, 120kg, 200kg plastic drums or ton boxes.
- Storage: Store at room temperature, away from heat and sunlight. Avoid contact with acids, alkalis, or salts. Keep sealed to prevent contamination. Shelf life: 6 months. If layered, stir well before use.
- Transportation: Keep sealed, protect from moisture, acids, alkalis, and rain.

Product safety

- According to the Globally Harmonized System of Classification and Labelling of Chemicals, this product is classified as non hazardous.
- No danger of combustion and explosives.
- Non toxic and environmentally friendly.
