

Organic Silicone Defoamer

AFC-8500E

Introduce

AFC-8500E is a new type of silicone defoamer. This product has outstanding defoaming performance in high temperature and strong alkaline environment, and can effectively prevent foam regeneration. It has good alkali resistance and high temperature resistance.

Features

- Excellent alkali resistance
- Excellent high temperature resistance
- Wide application range
- Excellent defoaming and anti-foaming properties

Application

- Textile, printing, dyeing and finishing
- Industrial cleaning
- Wide application
- Can be used as chemical additives

Item	Index
Appearance	Milky white uniform liquid
PH	6-9
Viscosity (25°C)	1000-5000Pa.s
Solid content	48 ± 1%
Density	0.9-1.1g/ml

Organic Silicone Defoamer

AFC-8500E

Method of use

- Direct addition: Pour the defoamer directly into the treatment tank at a fixed time and point.
- Continuous addition: Equip a flow pump at the relevant location where the defoamer needs to be added, and continuously add the defoamer to the system at a specified flow rate.

Transportation and packaging

- Packaging: Available in 25kg, 120kg, 200kg plastic drums or ton boxes.
- Storage: Store at room temperature, away from heat and sunlight. Avoid contact with acids, alkalis, or salts. Keep sealed to prevent contamination. Shelf life: 6 months. If layered, stir well before use.
- Transportation: Keep sealed, protect from moisture, acids, alkalis, and rain.

Product safety

- According to the Globally Harmonized System of Classification and Labelling of Chemicals, this product is classified as non hazardous.
- No danger of combustion and explosives.
- Non toxic and environmentally friendly.
